

Marking Lab:

R2 Marking Configuration
R2(config)#ip access-list extended web R2(config-ext-nacl)#permit tcp any any eq 80
R2(config)#class-map cmap R2(config-cmap)#match access-group name web
R2(config)#policy-map pmap R2(config-pmap)#class cmap R2(config-pmap-c)#set precedence network
R2(config-pmap)#interface e0/1 R2(config-if)#service-policy input pmap
R2#show policy-map interface e0/1

Let's generate some traffic from Client-XP to Server-XP related to HTTP.

Let's us check out the policy-map on R2 for Marking.

```
R2#show policy-map interface e0/1
Ethernet0/1

  service-policy input: pmap

    Class-map: cmap (match-all)
      21 packets, 3161 bytes
      5 minute offered rate 0000 bps, drop rate 0000 bps
      Match: access-group name web
      QoS Set
        precedence 7
        Packets marked 21

    Class-map: class-default (match-any)
```
